The Cole Center for Healing - A Natural Way To Better Health!

Our mission is to help each person to reach their highest level of health possible. Our vision is to transition the current disease management system of medicine to a true health care approach. We value the quality in everything we do. We strive to educate and empower without limits.

For over 20 years Dr. Theodore Cole has provided new and integrative approaches to traditional medicine. The Cole Center For Healing offers treatment of health conditions, such as, CP, stroke, MS, lyme disease, brain injury, fibromyalgia, etc. Our philosophy is centered around finding the causes of your health conditions not just treating the symptoms.
