

Greetings!

Speaking of Mindful Wellness...

Happy New Year...

- Let us begin 2021 with a promise to be optimistic! I am very eager, like many others, to have life get back to some sense of normalcy again. We are already seeing a number of clients start their year focusing on resolutions regarding health. You have control to improve your own health. Now is the perfect time!!!
- Thank you Dr. Glenn Pertuset, our newest mobile lab location, for the article about how you are incorporating thermography into helping improve the health of your patients.

One Size Doesn't Fit All

Happy 2021!

My name is Dr. Glenn Pertuset. I'm the owner/chiropractor at Advance Chiropractic & Nutrition, located on the eastside of Cincinnati. I have been serving the Cincinnati area for 8 years. My passion is helping those who cannot find answers elsewhere. I utilize chiropractic, applied kinesiology, nutrition response testing and electro-dermal screening (EDS) to assist my patients on their journey to health. My primary focus is determining root cause of symptoms and applying necessary protocols to restore health and function. No one size fits all approach, but unique protocols for each patient. Massage therapy, reflexology and hyperbaric oxygen treatments (HBOT) are a few other healing practices we employ.

Thermography has recently been added to the list of services offered within our practice. This procedure aligns perfectly with my philosophy. It is an especially useful tool for detecting problem areas that may need further evaluation. My suggestion is to use this procedure as a

screening method at least once a year. This can help focus on future potential problems. My methods are based on functional assessments to develop protocols for patients and thermography is a synergistic tool that helps pinpoint potential problems.

If there are any questions about my office or the evaluation processes we use, please check out our website at www.advchironutrition.com, email at glennpert@gmail.com, or give us a call at 513-843-7323!

Yours in Health, Dr. Glenn Pertuset, D.C.

Breast Care Corner

Dense breast tissue is very common....

Dense breast tissue is very common. One of the differences between thermography and mammography is that mammograms are looking for already established densities. Dense breast tissue can mask pathologies.

Thermography is looking at heat patterns. When breasts are thermally scanned, subtle breast abnormalities can be mapped, measured and monitored over time. This helps to address potential issues before they become a problem.

Hostess Incentive

Invite your breast friends to learn more about thermography....

Hostess receives \$50.00 for providing the space for Robin to come and do her presentation. (To be put towards her thermography scan.)

It can be virtual or in person.

Then she also receives an additional \$25.00 (to be put towards her scan) for every scan booked and performed as a direct result of the presentation.

Buy a Gift Certificate

Get your Thermography or Massage Gift Certificate.

Every penny counts! Remember that you can avoid paying Sales Tax for massage therapy by getting a prescription from your doctor or chiropractor. All it needs to say is "Massage as needed." The doctor then signs and dates it and TA DA, it's good for an entire year!!!

Schedule an Appointment

Schedule your Thermography scan online. Contact Jacky or Robin for more times!
